

TEST CORRECTION PROCEDURES

You have one week to complete test corrections. The week begins on the day your test grade is entered in Skyward.

You may get help with corrections DURING TUTORIALS. Make sure you understand your errors well enough to explain them clearly.

You must do the following on the test correction form for each incorrect question or problem.

- ◇ Number the problem/question and rewrite it
- ◇ Write at least 2 **complete sentences** explaining what your error was and what you need to do to correct it. Write enough to prove you understand it now.
- ◇ Show all necessary work to correct the problem or question and include the correct answer.

You can earn as much as half credit back for each corrected question.

EXAMPLE SENTENCES:

"I made a mistake with exponent rules in the original expression. I should have added the exponents, but instead I multiplied them. To fix this, I will have to use the product rule instead of the power rule."
